### **Forest Fires Project**

#### Import data and load packages

```
firedata <- read.csv("forestfires.csv", header=T)</pre>
library(ggplot2)
library(ggpubr)
library(hrbrthemes)
library(GGally)
library(gridExtra)
library(car)
library(glmnet)
library(Matrix)
library(ggfortify)
library(reshape2)
theme_update(plot.title = element_text(hjust = 0.5))
X <- as.numeric(firedata$X)</pre>
Y <- as.numeric(firedata$Y)
ISI <- as.numeric(firedata$ISI)</pre>
temp <- as.numeric(firedata$temp)</pre>
RH <- as.numeric(firedata$RH)</pre>
wind <- as.numeric(firedata$wind)</pre>
rain <- as.numeric(firedata$rain)</pre>
area <- as.numeric(firedata$area)</pre>
month <- as.numeric(firedata$month)</pre>
```

#### **Re-code Variables**

```
# Re-code Month Variable into Season Variable (categorical variable)
season <- numeric()</pre>
season[firedata$month=="dec" | firedata$month=="jan" | firedata$month=="feb"] <- 0 # win</pre>
ter
season[firedata$month=="mar" | firedata$month=="apr" | firedata$month=="may"] <- 1 # spr</pre>
season[firedata$month=="jun" | firedata$month=="jul" | firedata$month=="aug"] <- 2 # sum</pre>
season[firedata$month=="sep" | firedata$month=="oct" | firedata$month=="nov"] <- 3 # fal</pre>
firedata$season <- season
# Re-code Day Variable
day <- numeric()</pre>
day[firedata$day=="mon"] <- 1</pre>
day[firedata$day=="tue"] <- 2</pre>
day[firedata$day=="wed"] <- 3</pre>
day[firedata$day=="thu"] <- 4</pre>
day[firedata$day=="fri"] <- 5</pre>
day[firedata$day=="sat"] <- 6</pre>
day[firedata$day=="sun"] <- 7</pre>
firedata$day <- day
```

#### Randomize rows (before splitting into training and validation)

Use set.seed() function for reproducibility

```
set.seed(1)
sample <- sample(nrow(firedata))
firedata <- firedata[sample,]</pre>
```

#### Form Training and Validation Data Sets (split data 50-50)

```
firedata_train <- firedata[1:259,] # 50% of the data
firedata_valid <- firedata[260:517,] # 50% of the data</pre>
```

### Assign Variables in Training Data Set

```
X <- firedata_train$X
Y <- firedata_train$Y
month <- firedata_train$month
season <- firedata_train$season
day <- firedata_train$day
temp <- firedata_train$temp
RH <- firedata_train$RH
wind <- firedata_train$wind
rain <- firedata_train$rain
area <- firedata_train$area
ISI <- firedata_train$ISI</pre>
```

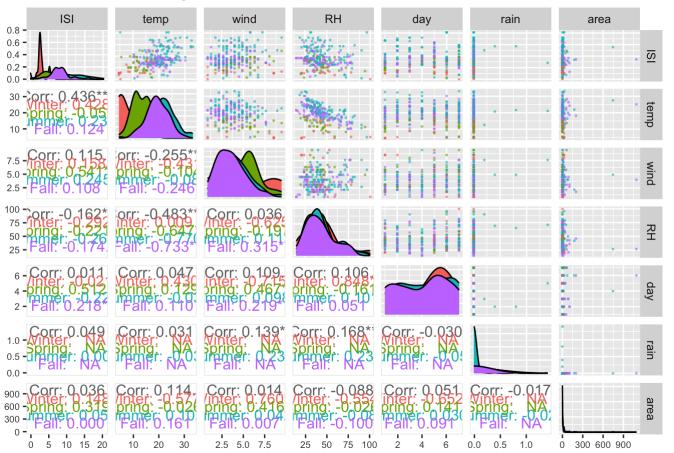

#### **Summary Statistics**

summary(firedata\_train)

```
